Professional Summary

Hello World! I am a passionate developer with a strong background in JavaScript, React, and Node.js. I have experience working with clients to deliver high-quality software solutions. As a quick learner, I thrive in fast-paced environments. Currently, I am a full-time college student pursuing a degree in Software Engineering and Cybersecurity. I am seeking a full-time tech-related position to start my career.

Programming Skills

HTML, CSS, JavaScript, React, Node.js, Java, Git, GitHub Codespaces, Netlify, Vercel, DigitalOcean, AngularJS, Next.js

Skills,

Multi-tasker, Problem Solver, Team Player, Fast Learner

Education

Associates of Science

2023 - Present

Software Engineering
Sinclair Community College
Dayton, OH

Awards

Tech Prep Scholarship

Awarded $3,000 ($425 per semester) through the prestigious Sinclair Tech Prep BOGO Scholarship.

Certifications

PLTW - Introduction to Engineering Certification

Completed a comprehensive 2-year high school engineering program through Project Lead The Way (PLTW).

Relevant Experience

JS Developer
Fourthwall [Remote]
2023 - Present

- Application Development: Proficient in creating JavaScript applications that improve operational efficiency, as evidenced by developing a ticket management system that increased support productivity by 20%.

- System Maintenance and Optimization: Skilled in maintaining and enhancing applications to ensure they perform optimally and adapt to changing requirements.

- Operational Support: Experienced in providing day-to-day support and troubleshooting to ensure seamless functionality and high user satisfaction.

SIO (Safety Information Officer) - Public Safety
Sinclair Community College
2023 - Present

- Campus Navigation Assistance: Provided clear and effective instructions to students on locating facilities and resources on campus, enhancing their ability to navigate the environment.

- Building Access Support: Assisted students with building entry procedures, ensuring they can safely and efficiently access campus buildings.

- Student Guidance & Support: Offered personalized guidance and support to students, addressing their questions and concerns related to campus logistics and safety.

Freelance Developer
ATXYZ (AthenaTools)
2019 - Present

- JavaScript Proficiency: Expertise in JavaScript and related frameworks/libraries (e.g., React, Node.js, Angular) to build dynamic and responsive web applications.

- Project Management: Strong organizational and time-management skills to handle multiple projects, meet deadlines, and deliver high-quality work to clients.

- Problem-Solving: Ability to troubleshoot, debug, and optimize code, providing innovative solutions to complex technical challenges.

Projects

Project ATXYZ
- ATXYZ is my organization dedicated to various projects and collaborations, encompassing website development, cybersecurity initiatives, and more.

- Developed using React, JavaScript, HTML, and CSS.
